

+ Research Showcase

China, October 2014

**The University of Queensland's Faculty of Medicine + Biomedical Sciences
is a leader in medical and biomedical research.**

We combine world class facilities, leading researchers, and award-winning teaching staff to create an optimum environment for education and research in medicine, public health, and biomedical sciences. Our research strengths cross the spectrum of enquiry into human health, from cancer and skin disease, brain and mental health, maternal and child health, chronic and critical illness, to health care delivery, and endless variations in-between.

WE INVITE YOU TO DISCOVER WHY WE ARE ONE OF AUSTRALIA'S LEADING BIOMEDICAL HEALTH FACULTIES

Leading researchers from M+BS' School of Biomedical Sciences [SBMS]; A/Prof Peter Noakes, Prof Chen Chen, and A/Prof Conrad Sernia, will be visiting high-ranking Chinese universities and institutions to:

- + Explain our postgraduate PhD program to interested students and staff
- + Meet with research and academic staff to find areas of research interest and possible collaboration
- + Identify, encourage and support interactions which lead to submissions of joint research grants

With research strengths in neurodegenerative, respiratory, foetal, cardiovascular, endocrine and metabolic diseases, SBMS' focus is on basic science as well as translational medicine. SBMS has embarked on the globalization of its PhD program by forming links with research-focussed universities and institutes. Many high-profile researchers are able to join major projects with colleagues in China and attract support from national and international funding agencies.

"Our aim is to graduate scientists who will be recognized internationally for superior originality of thought, experimental skills and high-impact publications."

**Professor Chen Chen.....Head of Delegation; Director of International affairs
Associate Professor Peter Noakes.....Deputy Chair of Postgraduate Studies
Associate Professor Conrad Sernia.....Coordinator and Chair of Postgraduate Studies**
