

# Young Leaders Program The New Frontier in Healthcare

11 – 26 July 2019

## The University of Sydney

We are Australia's first university, with a history of leading new thinking and welcoming people from all social and cultural backgrounds for more than 160 years. We offer the widest range of academic programs of any university in Australia, and are a member of the Group of Eight network of leading Australian research universities.

Since our inception, we have believed in education for all and leadership that makes lives better. Our alumni have inspired, led, entertained, challenged and improved the world around them. We have produced seven prime ministers, two Nobel Laureates, three astronauts, 110 Rhodes scholars, one Pulitzer Prize winner and 149 Olympic athletes. Our main campus is also recognised as one of the most beautiful in the world.

## Young Leaders Program

The **Young Leaders Program** consists of a customised suite of non-award academic focused short courses. It aims to help the next generation of international leaders achieve their potential. It is managed by the International Leaders Program team at the University's Office of Global Engagement.

CRICOS 00026A

## The program

The Young Leaders Program: **The New Frontier in Healthcare** is a customised non-award multidisciplinary academic course. The course has a specific focus on developing students understanding of the latest developments, trends and innovations – as well as the challenges – in the worldwide healthcare sector.

It draws on the knowledge of experts from the University of Sydney and the health care sector to provide students with a wide ranging perspective. The academic component may be taught by academics and researchers from Arts and Social Sciences, Engineering and Information Technologies, Sciences, Health, Pharmacy and Medicine.

The course comprises of lectures, seminars, group work and educational field trips; balancing theory with clinical and professional knowledge. Classes are interactive and draw upon case studies and scenario based learning with an emphasis on real-world application. In addition, students will have an immersive experience of Australian culture and society through various social and cultural activities; providing a holistic opportunity to develop their intercultural awareness, communication and teamwork skills.

## Program dates

11 to 26 July 2019

- 11 July: arrive in Sydney
- 12 July: program starts
- 25 July: program ends
- 26 July: departure

## Participants

University students with a strong interest in healthcare at all levels of study are welcome to apply. We received students studying basic and clinical sciences, biomedical engineering, life sciences and pharmacy.

The course will be taught and assessed in English. Although we will not request evidence of a formal English language assessment, an adequate level of English language ability (IELTS 6.5, TOEFL IBT 79 or above) is recommended in order to achieve the best outcomes from the program.

Participants will have the opportunity to meet students from other leading universities with different academic backgrounds in joint lectures, and also meet local University of Sydney students.

## Testimonial

*'The program is truly interdisciplinary and includes a range of topics in pharmaceutical sciences, medicine, public health, biomedical engineering and medical ethics. It was an eye opening experience which really encouraged me to think outside of the box and get out of my comfortable zone.'*

*'Sydney is such a multicultural society. People are so friendly, relaxed and tolerant. I really enjoyed living in Sydney.'*
